

ECommerce

Ecommerce Project

* This is a simple e-commerce project. In this project we take two types of user.

1. Ordinary User
2. Admin

* Privilege of User 1 →

1. Signup
2. Login
3. forgot password
4. check product
5. Buy Now
6. check Detail

2 Privilege of User 2 →

1. Login
2. Add Product
3. Remove Product
4. Buy
5. check Detail → Networking

Requirement to run this Project

1. Angular 17.2.3
2. Java Spring boot → 3.2.0
3. Java-17
4. Postgres → 16.2

How It work →

1. first you need to create a Database in your 'PgAdmin' check application properties
2. then run your Spring boot Project and run your Angular Project.
3. open browser type which port are running
4. type http://localhost:port, then it go to baseurl
baseurl/login
baseurl/login
5. Choose Login type
user o Admin

6. No Need to user Id or Password
no need to Signup
direct click on Login
button.

7. if user1 then ~~choos~~ privilege
else privilege2
